

## TAIL PIPE ADAPTERS / NOZZLE SERIES "600"

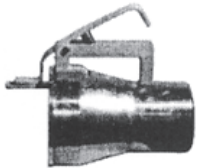

### IMPORTANT

Always use a tailpipe adapter between the flexible tube and the exhaust pipe of the vehicle. Depending on the size and design of the exhaust pipe a suitable connecting nozzle is selected. Our adapters do not fit tightly over the exhaust pipe and therefore do not create a negative pressure in the vehicle pipe. Fresh air is drawn into the exhaust system which decreases the exhaust temperature. Sourcetec also manufactures custom adapters to suit all applications.

#### 1600

Steel construction. Complete with spring loaded damper. All sizes available.

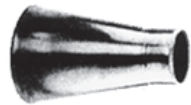

#### 2600

Steel construction. Complete with hand grip and self locking manual damper. All sizes available.

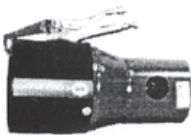

#### 5600RC

Galvanized steel cone adapter with manual damper and a slot to accommodate the rain cap. Stainless steel is optional. All sizes available.
