

SourceArms

SAL Series

Available in a range of lengths from 5' to 7' and from a 4" diameter up to 8"

SAM Series

Available in a range of lengths from 8' to 14' and from a 4" diameter up to 8"

SAP Series

Fume extractor with a reach from 16' to 20'

SAR Series

Fume extractor with a reach from 22' to 30'

SUPER SAP Series

Fume extractor with a reach from 32' to 35'

Solid Tube Arms

ST Series

Solid Tube Fume extractor with a reach from 4' to 16'

SWST Series

Solid Tube Fume extractor with a reach from 5' to 14'

Mini Arms

MAS Series

Mini Arm - 2" or 3" diameter hose in a 3' or 5' length

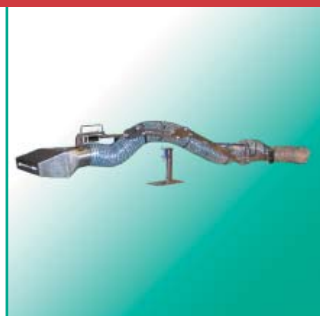

Retractable Arms

RAS Series

Retracted length approx 4', extended length of 8'

Custom Arms

Custom Arms

Custom engineered and designed for all your unique extraction needs

Sourcetec Industries is one of the most experienced manufacturers and custom designer's of Source Capture arms in North America. Our newly designed **SourceArms®** are on the leading edge of fume extraction design and technology. Unlike many other arms in the field, our **SourceArms®** are freely suspended alleviating the need for huge friction discs and resolving the long standing issue of shaky joints. The result is an amazingly easy arm to use and maneuver.

SourceArms® are externally supported which allows the air to move freely without restriction in the flexible and/or solid tubing. This results in the need for a much less powerful fan and in turn less energy consumed. No matter what your application, Sourcetec Industries can design a **SourceArm®** for you.

SourceArms

SAL Series

SourceArm series SAL is the smallest in our SourceArm line of fume extractors. SAL's compact design allows installation where space is limited but maneuverability and reach are still essential. Available in a variety of metals and finishes to suit the appropriate application. Standard equipment includes mounting bracket, support, hose, hood, 4 way swivel and manual damper. 360 degree swivel and poly hoods are available upon request. SAL's are available in a range of lengths from 5' to 7' and from a 4" diameter up to an 8" diameter. For larger diameters, please contact factory, some restrictions may apply.

SAM Series

This is our small to mid-sized SourceArm designed for source capture only. SAM is intended for wall mounting, however its' unique double-jointed design enables column or ceiling mounting. With SAM's flexibility it can be placed directly over the fume source and still be moved 350 degrees. SAM is available in a variety of metals and finishes to suit the appropriate application. Standard equipment includes mounting bracket, support, double joint, hood, 4-way swivel and manual damper. SAM'S are available in a range of lengths from 8' to 14' and from a 4" diameter up to an 8" diameter. For larger diameters, please contact factory, some restrictions may apply.

SAP Series

This is our mid to long range SourceArm fume extractor with a reach from 16' up to 20'. SAP's uniquely strong yet flexible construction allows for smooth single handed maneuverability anywhere inside a 20' radius, with a 4-way swivel. Available in a variety of metals and finishes to suit the appropriate application. Standard equipment includes mounting bracket, support, hose, hood and manual damper.

SAR Series

This SourceArm is designed to cover large areas ranging from 22' up to 30' with complete flexibility. Like our other SourceArm products SAR & SAP's heavy duty construction assures you of a solid, easy to maneuver fume extractor that will perform the most demanding jobs for a long time. Available in a variety of metals and finishes to suit the appropriate application. Standard equipment includes mounting bracket, support, hose, hood, 4 way swivel, ball bearings, brake mechanism, and manual damper.

SUPER SAP Series

This SourceArm is designed to cover large areas ranging from 32' up to 35' with complete flexibility. Like our other SourceArm products SAR & SAP the heavy duty construction assures you of a solid, easy to maneuver fume extractor that will perform the most demanding jobs for a long time. Available in a variety of metals and finishes to suit the appropriate application. Standard equipment includes mounting bracket, support, hose, hood, 4 way swivel, ball bearings, brake mechanism, and manual damper.

Solid Tube Arms

ST Series

The ST Series is made of solid tube is equipped with a 180 plus degree swivel as standard and comes in 4' to 16' lengths. The joints are unique and mounted externally to allow ease of adjustments. They are equipped with heavy duty PVC based flexible tube for extremely rough use with excellent flexibility and abrasion resistant characteristics. Standard equipment includes mounting bracket, support, solid tube and flexible tube (on joints) hood, 4 way swivel and manual damper.

SWST Series

SWST SourceArm is made of solid tube with a 360 degree swivel and comes in 5' to 14' lengths. The joints are unique and mounted externally to allow ease of adjustments. They are equipped with heavy duty PVC based flexible tube for extremely rough use with excellent flexibility and abrasion resistant characteristics. Standard equipment includes mounting bracket, support, solid tube and flexible tube (on joints) hood, 4 way swivel and manual damper.

Mini Arms

MAS Series

The Sourcetec Mini-Arm is ideal for small areas where source capture is required. They can be bench or wall mounted to suit the application. Available in 2" or 3" diameter hose in a 3' or 5' length. These Mini-Arms may be attached to the Sourcetec CFK, GFK and MFC Filter Units for direct source capture.

Retractable

RAS Series

Sourcetec RAS is a telescoping retractable flexible arm designed for use in very confined places. It is easy to position due to the unique latching mechanism acting on the inner tube, combined with Sourcetec's external balancing system. The RAS is also externally supported from the outside resulting in no restriction of airflow through the arm. Its joints and components are not constantly exposed to harsh particles of dust and fumes and the center double joint allows the arm to rotate freely back to itself. Approx retracted length 4', extended length 8'.

Custom

CUSTOM Arms

Fume problems will always vary which is why Sourcetec Industries offers an exceptional engineering and design service. Coupled with our application division, we look forward to finding the right solution and equipment for your special needs. If you don't find what you're looking for, we can custom design any arm to suit your particular application.
