

High Pressure Blowers SERIES "SRD"

The type-SRD is a high pressure blower made of cast aluminum. Pending on the rating, the SRD blower is equipped with either a radial or a backward inclined wheel.

Applications

- industrial exhaust systems
- exhausting fumes and dusty air
- supplying air for cooling applications
- cooling, conveying, and pressurizing
- used in many food applications

Accessories

- steel casing
- inlet/outlet guard
- inlet/outlet flange
- belt drive
- belt guard
- isolators and vibration rails
- drain
- motor shaft lock
- handles for portability
- ON/OFF switches w/controls
- steel or stainless steel wheels
(restrictions apply)

Construction

Housing is made of cast aluminum. The SRD blower is equipped with a heavy cast aluminum wheel, dynamically balanced and tested for efficient operation. The SRD blower is weather-proof, and it is supplied with backed enamel coating.

Non-sparking

Sourcetec cast aluminum blowers are AMCA Type-B spark resistant, with the addition of a non-sparking shaft they meet AMCA Type-A requirements.

Rotation and Discharge

The SRD blower may be oriented in any standard clockwise or counter-clockwise direction. Normally, it is furnished for clockwise rotation.
